

# **VMD105 PORTFOLIO**

By Erika Opfell

# About Me

Welcome to Erika's portfolio from her VMD105 class in Spring 2021. I am mainly interested in photography and wanted to deepen my skills in Adobe Lightroom. From taking this class I have found enjoyment from Illustrator and Animate. Here are some of my past projects from the class.

## Raster Graphic Final Project

I had a vision of creating a movie poster in a Godzilla-esque scene set in San Francisco. This project brushed up on my dust collecting photoshop skills. It was daunting thinking about the many layers this project would need however it was ultimately a pleasant project to create.

### **Vector Graphics Final Project**

Illustrator was foreign and a challenge to me. My concept for this project an illustrated postcard of an iconic view in San Francisco. I based my illustration from a photo I took of this view. I love this view and the city of San Francisco.

### **Time Based Media Final Project**

Adobe Animate was absolutely a fun learning process. It was intimidating at first but I warmed up to the program fairly quick. By learning the animation process it has made me think about animated film more so from the production side. My concept for this project is a cozy cup of coffee sitting at a window's ledge on a rainy San Francisco winter's day.

**Thank you!**
