Hello, My name is Jennifer Wong! My hobbies include sewing and drawing, and a lot of the inspiration for my art comes from the animes I've watched or video game I've played. Before I took this course, I had no prior experience with mainstream Adobe programs such as Photoshop, Illustrator, etc. except for Lightroom. Being in this class has definitely helped me hone my skills in using these programs and familiarize myself with them.

Adobe Photoshop

This was my first project that I've worked on in this class

and I had a lot of fun playing around with custom brushes

when doing this. My theme for this image was curiosity, I

also love pastel colors so I wanted to go for a more subtle

and soft look which I did using floral patterns and brushes.

Adobe
Illustrator

*For my Illustrator project, I wanted to create a
cartoon persona of that would also seem like an
inspirational figure or a idealized version of me.
In this picture, I created my character using the
shapes and pathfinder tools. I also wanted to make
it seem like they coexist in our world too so I placed
them in an image of SF and them cheering me on.*

Adobe
Animate

I had a lot of fun working on this project and in my opinion, probably the most

enjoyable for me. I tried going for a goofy cartoon feel for my animation just like

Tom and Jerry. Most of the assets such as the backdrop and characters, I made

through Illustrator and sound effects I've found online. If I ever were to revisit

this project, I would try to redo it to make the movement look more fluid.
