

# *VMD 105*

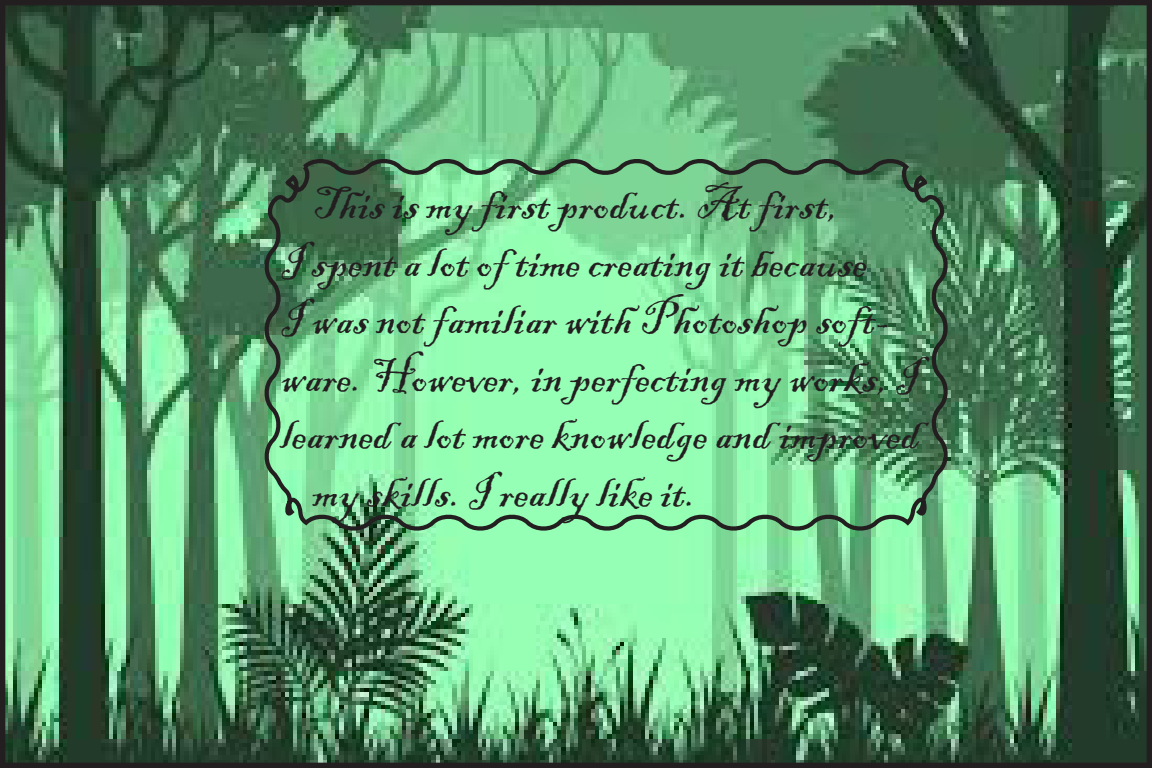

Minh Phat Tran

*Hello everyone!*

*My full name is Minh Phat Tran. I am going to show you all the artworks I've done during this class which is a great class I registered for. I wanted to register for the VMD 105 class to learn and know more about adobe design software. As a result, I had a great experience and improved my basics and know more general knowledge.*

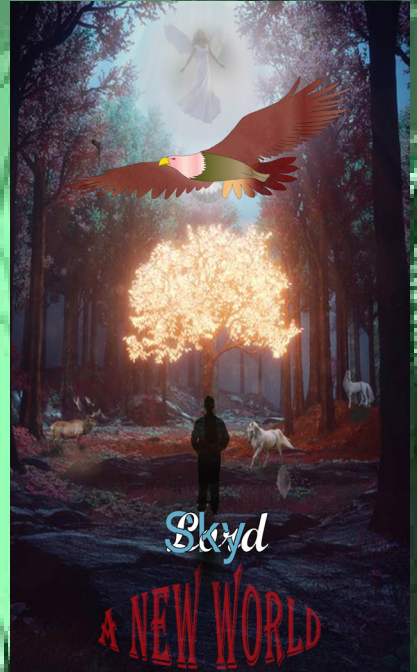

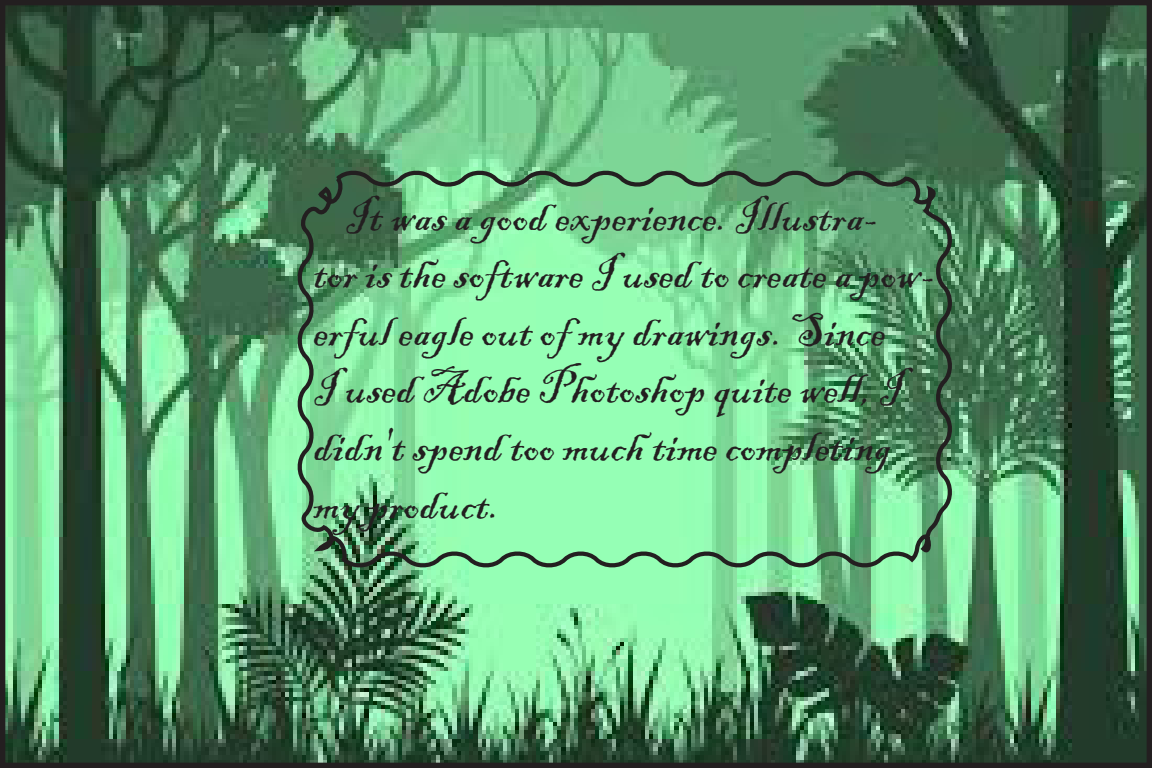

## Easter Project

*This is my first product. At first,  
I spent a lot of time creating it because  
I was not familiar with Photoshop soft-  
ware. However, in perfecting my works, I  
learned a lot more knowledge and improved  
my skills. I really like it.*

# Vector Project

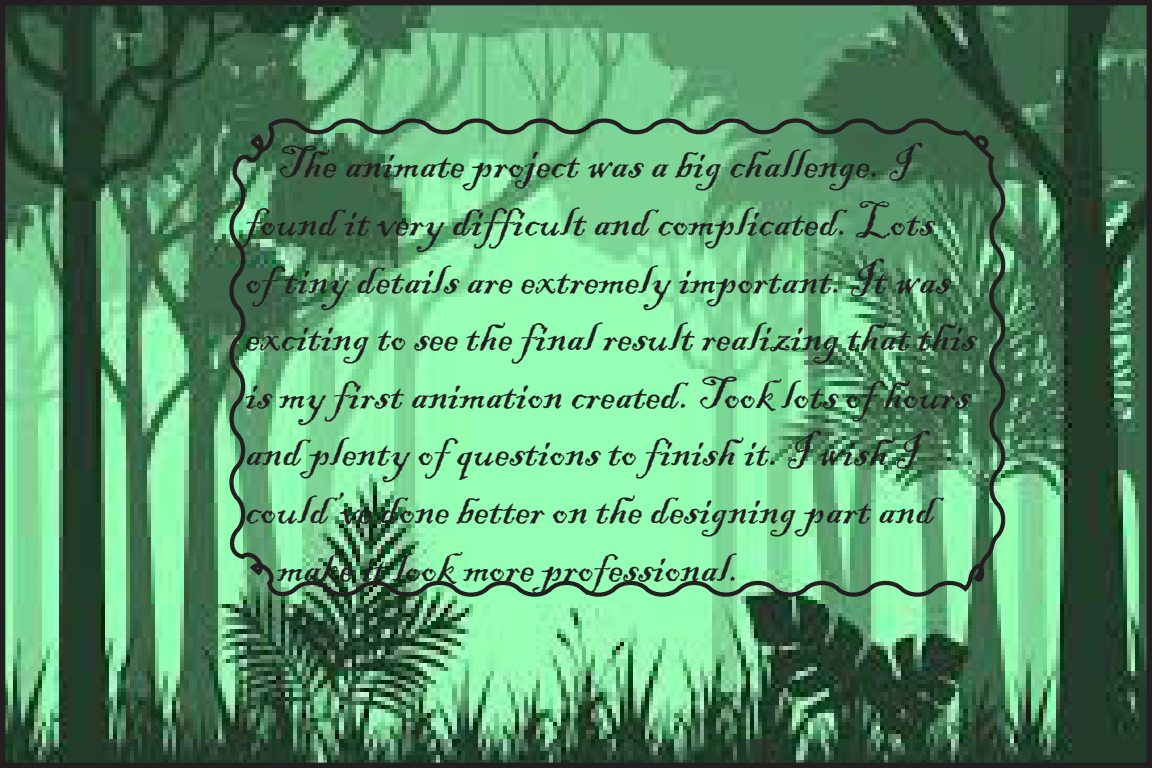

*It was a good experience. Illustrator is the software I used to create a powerful eagle out of my drawings. Since I used Adobe Photoshop quite well, I didn't spend too much time completing my product.*

**Animate Proj-**

*The animate project was a big challenge. I found it very difficult and complicated. Lots of tiny details are extremely important. It was exciting to see the final result realizing that this is my first animation created. Took lots of hours and plenty of questions to finish it. I wish I could've done better on the designing part and make it look more professional.*
