**HASSE**

I decided to take Visual Media Design 105 this semester because I wanted a refresher in design skills. I graduated with a BA in Design from UC Davis in 2014 and have worked mainly as an interior designer and calligrapher since. I hope to continue taking design classes at CCSF to further develop my digital creative skills and to broaden my career opportunities in the future. I may decide to pursue the Design Foundation Certificate available at CCSF.

ONE-OF-FIVE

# ADOBE PHOTOSHOP RASTER PROJECT

*All grown-ups  
were once children...  
but only few of them  
remember it.*

*- The Little Prince*

REN'S  
ATTACHABLE

For my raster project, I wanted to create a whimsical scene. I found a photo of a girl flying on a paper crane, and suddenly I saw this whole image come to life in my head with her flying above the sea. Her crown made me think of The Little Prince, one of my favorite novels as a child. I included a quote from the book that I felt tied together the ethereal and dreamy aesthetic I was going for.

# ADOBE ILLUSTRATOR VECTOR PROJECT

I had a lot of fun creating a character for the vector project. Again, I chose a “whimsical” idea, this time with a little mouse named Olivia, flying over town using the wind and her blue umbrella. I really like how simplistic the illustration style can be, and yet small details can convey so much in the character design. I would definitely be interested in learning more Adobe Illustrator skills to learn how to make more complex vectors and character designs.

ADOBE ANIMATE  
MOTION PROJECT

The motion project was so much fun! I have a serious appreciation for animators now that I have experience making a little animation of my own. I am happy that I was able to accomplish the storyboard I set out to animate- a little penguin named Gunter who decides to take a dip in the water and lands with a big splash at the end. It was so much work to animate, but it was definitely satisfying in the end!
