

Introductionw

1

Hi All. I'm Sasha and I'm a student at CCSF. My major is Graphic design, I would like to become a product designer in a company that will divide my life values. In this project, I would like to show all my work that I made in VMD 100 class. My work includes Adobe Photoshop, Adobe Animation, and Adobe Illustrator work.

A decorative dotted line consisting of small black dots arranged in a curve that starts from the left side of the slide and extends towards the right, ending just above the purple footer bar.

VMD 105 InDesign Project

Adobe Photoshop

2

In this project, I learned how to work with a basic photoshop command. I made a hollidays postcard I would like to physically send to friends and family for a wither holidays. I was really enjoying working with majique Photoshop properties.

Adobe Illustrator

3

It was one of the hardest Modules for me. Pen tools didn't obey my commands and it was hard in a beginning, but after few lessons, I can draw pretty well and I'm glad about the results of my project

VMD 105 InDesign Project

Adobe Animation

4

Adobe Animation was one of the most fun projects for me. I animated vector animals, add sounds, and made some motion tweens, and as a result, I get my first 6-second 'Happy Farm' animation.
