A dark, atmospheric photograph of a cave interior. The scene is dominated by a deep teal and black color palette. Stalactites hang from the ceiling, their surfaces glistening with water droplets that catch the light. Several bright, glowing blue spots of varying sizes are scattered throughout the frame, some appearing as sharp points of light and others as larger, more diffused areas. The overall mood is mysterious and ethereal.

Living in a Cave

by Victor Lau

About

Hello, my name is Victor Lau and I have been living in a cave for the Entire Year! In the year 2020:

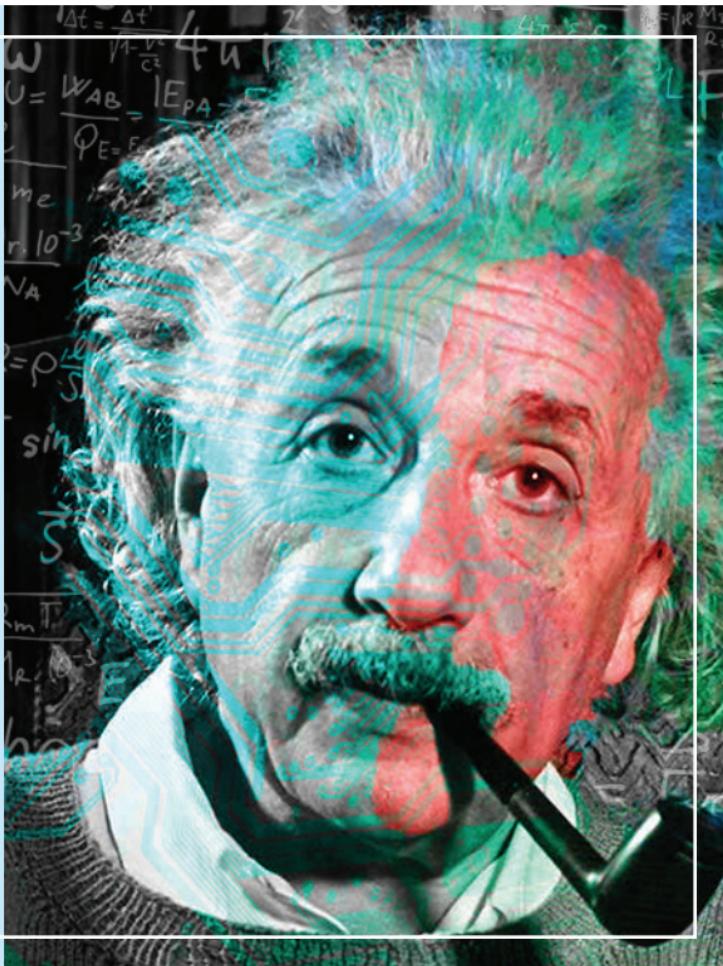

- I am poor + broke + don't have a job
- The world was plague with Coronavirus
- Half the country was rioting
- The entire west side of the country was on fire because of the forest fires
- Schools, Government, and Companies failed because they are outdated (10-15 years behind) and don't know how to use technology. They refuse to adapt
- Corruption is everywhere and everyone is too busy fighting among themselves.

I stayed in my cave and watched the world burn... Is there anything positive to say? Why are you so "Negative"?

I played games, and made videos for your entertainment. Your welcome! Also art by Yuumei.

Portrait Project

In this first project I made a portrait of Einstein. I decided to put whatever I thought that relates to Einstein. Math/Technology

Vector Project

For this Vector Project I made a vector of Monster Giant Corona-Chan attacking the City of San Francisco.

Animate Project

In this Animate Project I reused the same Vector project resources to make Corona-Chan Trick or Treating. Now just imagine Corona-Chan giving viruses to kids as treats.

In the Year 2020

InDesign Project

The next InDesign project is the current one that you are seeing with me talking about living in a cave.

The End
